Once again, new interpretations are presented of some of the most famous architecture of the period. Work by lesser-known architects, whose influence and role have been overlooked by conventional histories of the subject, is discussed. The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches. Filled with beautiful photographs, plans and architect's drawings, this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today.
