Self-Healing Systems and Wireless Networks Management Junaid Ahsenali Chaudhry

Do you believe in open-source development? Would you like to see your security system grow and learn by itself? Are you sick of paying for software license fees every year that produce little return on investment? And, would you prefer to invest in something you could sell later on to other IT security departments? If you answered yes to these questions, then this is the book for you.

Addressing the issues of fault identification and classification, **Self-Healing Systems and Wireless Networks Management** presents a method for identifying and classifying faults using causal reasoning?a powerful bottom up technique for deep surface and cross context correlation establishment. It explains how to employ a similarity matrix to match the user activity log and its pattern in a transformed space and discusses the development and deployment of a policy engine.

The book describes how to use this self-growing policy engine in collaboration with a scheduler and plug-in bank to generate a healing policy. This healing policy presents the solution of the direct and causal fault. The author describes how to embed the solutions of the related faults in the healing policy so that if a client faces more faults related to the previous one, they can be addressed at the client side.

Exploring prototype systems, the text defines supporting systems architectures and includes a case study of an autonomic healing-based self-management engine. It also explains how to fulfill the tasks in linear time, so that the increase in the source file size does not affect the performance of your system?making the system highly scalable for distributed self-healing systems.

This book provides valuable guidance to help you build a self-growing, self -earning, self-healing system that, after development, learns for itself about the IT security vulnerabilities of your organization and fills the holes for future breach prevention.

From reader reviews:

Daniel Scholz:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each book has different aim or maybe goal; it means that reserve has different type. Some people really feel enjoy to spend their time to read a book. They may be reading whatever they have because their hobby is actually reading a book. How about the person who don't like reading through a book? Sometime, particular person feel need book when they found difficult problem as well as exercise. Well, probably you will require this Self-Healing Systems and Wireless Networks Management.

Brian Crowe:

Do you certainly one of people who can't read pleasurable if the sentence chained from the straightway, hold on guys this particular aren't like that. This Self-Healing Systems and Wireless Networks Management book is readable by means of you who hate those perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to provide to you. The writer involving Self-Healing Systems and Wireless Networks Management content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different available as it. So , do you still thinking Self-Healing Systems and Wireless Networks Management is not loveable to be your top checklist reading book?

Leesa Banta:

The experience that you get from Self-Healing Systems and Wireless Networks Management could be the more deep you rooting the information that hide inside words the more you get serious about reading it. It does not mean that this book is hard to recognise but Self-Healing Systems and Wireless Networks Management giving you enjoyment feeling of reading. The copy writer conveys their point in specific way that can be understood by means of anyone who read this because the author of this reserve is well-known enough. This book also makes your personal vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this Self-Healing Systems and Wireless Networks Management instantly.

Mary Moore:

Spent a free time for you to be fun activity to complete! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, gonna beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your own free time/ holiday? May be reading a book can be option to fill your free time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to try out look for book, may be the guide untitled Self-Healing Systems and Wireless Networks Management can be very good book to

read. May be it is usually best activity to you.
