Biobased Lubricants and Greases: Technology and Products Lou Honary, Erwin Richter

Due to the rise in petroleum prices as well as increasing environmental concerns, there is a need to develop biochemicals and bioproducts that offer realistic alternatives to their traditional counterparts; this book will address the lack of a centralized resource of information on lubricants and greases from renewable sources, and will be useful to a wide audience in industry and academia. It is based on 20 years of research and development at the UNI-NABL Center, and discusses the various types of vegetable oils available, comparing their characteristics, properties and benefits against those of typical petroleum oils as well as discussing common evaluation tests and giving examples and case studies of successful applications of biobased lubricants and greases. Whilst scientific and engineering research data is included, the book is written in an accessible manner and is illustrated throughout. Focuses on an industrial application of lubrication technology undergoing current explosive growth in the global market. Includes a detailed review of the material benefits of plant-based lubricants that include a better viscosity index and lubricity even at extreme temperatures, lower flammability due to higher flash points and lower pour points. Covers the basic chemistry of vegetable oils as well as their profiles for use in lubricants and greases and environmental benefits. Includes examples and case studies of where vegetable-based lubricants have been successfully employed in industry applications.

From reader reviews:

Richard Sims:

Reading a reserve tends to be new life style in this particular era globalization. With studying you can get a lot of information that could give you benefit in your life. With book everyone in this world can share their idea. Publications can also inspire a lot of people. Many author can inspire all their reader with their story or even their experience. Not only situation that share in the guides. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on this planet always try to improve their ability in writing, they also doing some analysis before they write with their book. One of them is this Biobased Lubricants and Greases: Technology and Products.

Pamela Watkins:

Do you have something that you enjoy such as book? The publication lovers usually prefer to select book like comic, quick story and the biggest an example may be novel. Now, why not hoping Biobased Lubricants and Greases: Technology and Products that give your satisfaction preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be explained constantly that reading practice only for the geeky person but for all of you who wants to be success person. So , for every you who want to start looking at as your good habit, you may pick Biobased Lubricants and Greases: Technology and Products become your personal starter.

Kevin Hardy:

As a college student exactly feel bored to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading is not important, boring along with can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Biobased Lubricants and Greases: Technology and Products can make you really feel more interested to read.

Georgia Cunningham:

E-book is one of source of expertise. We can add our knowledge from it. Not only for students but in addition native or citizen need book to know the upgrade information of year to year. As we know those textbooks have many advantages. Beside we add our knowledge, could also bring us to around the world. By book Biobased Lubricants and Greases: Technology and Products we can acquire more advantage. Don't you to be creative people? Being creative person must love to read a book. Merely choose the best book that

appropriate with your aim. Don't possibly be doubt to change your life at this time book Biobased Lubricants and Greases: Technology and Products. You can more attractive than now.
