Baby potty training is one of those milestones in your child's life - it can be an incredible bonding experience between the child and his / her parents. It's also an important step in the development of the child because for the first time in the baby's life, he / she will have a feeling of independence and responsibility. Once potty trained, your baby will be responsible for taking themselves to the potty to do their business.

Potty training a child successfully - and quickly - does not happen accidentally (no pun intended :>)? Rather, parents who want to potty train a child in days must arm themselves with a time-tested system and a well-thought-out plan of action - one that builds their self-confidence and allows them to tap into their strengths and avoid the most common - and costly - pitfalls.
