A Scientific Approach to Biblical Mysteries Robert Faid

A Scientist Examines Biblical Mysteries

This book is the result of over fifteen years of research by Robert W. Faid. Using his knowledge of science, mathematics, history, archaeology, linguistics, and theology, he presents documented evidence which may help explain how some events, which skeptics claim never happened, can be scientifically authenticated. This book provides a wealth of information for believers and can be used as a powerful witnessing tool for skeptics. Some of the topics included are:

- Is Genesis really an eyewitness account?
- Why can't we live as long as Methuselah did?
- Were there really giants in biblical times?
- What the Star of Bethlehem really was.
- When was Jesus born?
- When was the Crucifixion?
- Has modern genetics found Adam and Eve?
- Has science located the physical heaven and hell?
- Has our sun already been turned off?

Robert W. Faid, a nuclear scientist and consultant to the nuclear power industry, has developed patented processes which have been used to protect nuclear power plants around the world against earthquakes and flooding. Now retired, he uses his knowledge of science and his research skills in writing Christian books. He appears frequently as a guest on radio and television programs and speaks and conducts seminars on a variety of topics.
